# The Problem

# Parking in CPP is a nightmare

- Have you ever walked back to you car after class, to be followed the entire way by someone hoping to get your spot?

# **Our Solution**

- Our solution is simple, a web service that allows students that already have a parked vehicle to advertise their spot.

A Web Page

http://SJJHWebService.com/addParkingSpot

I am in Building number

1	2	3	4	5	6	7	8	9	10
---	---	---	---	---	---	---	---	---	----

And I have a Parking spot in

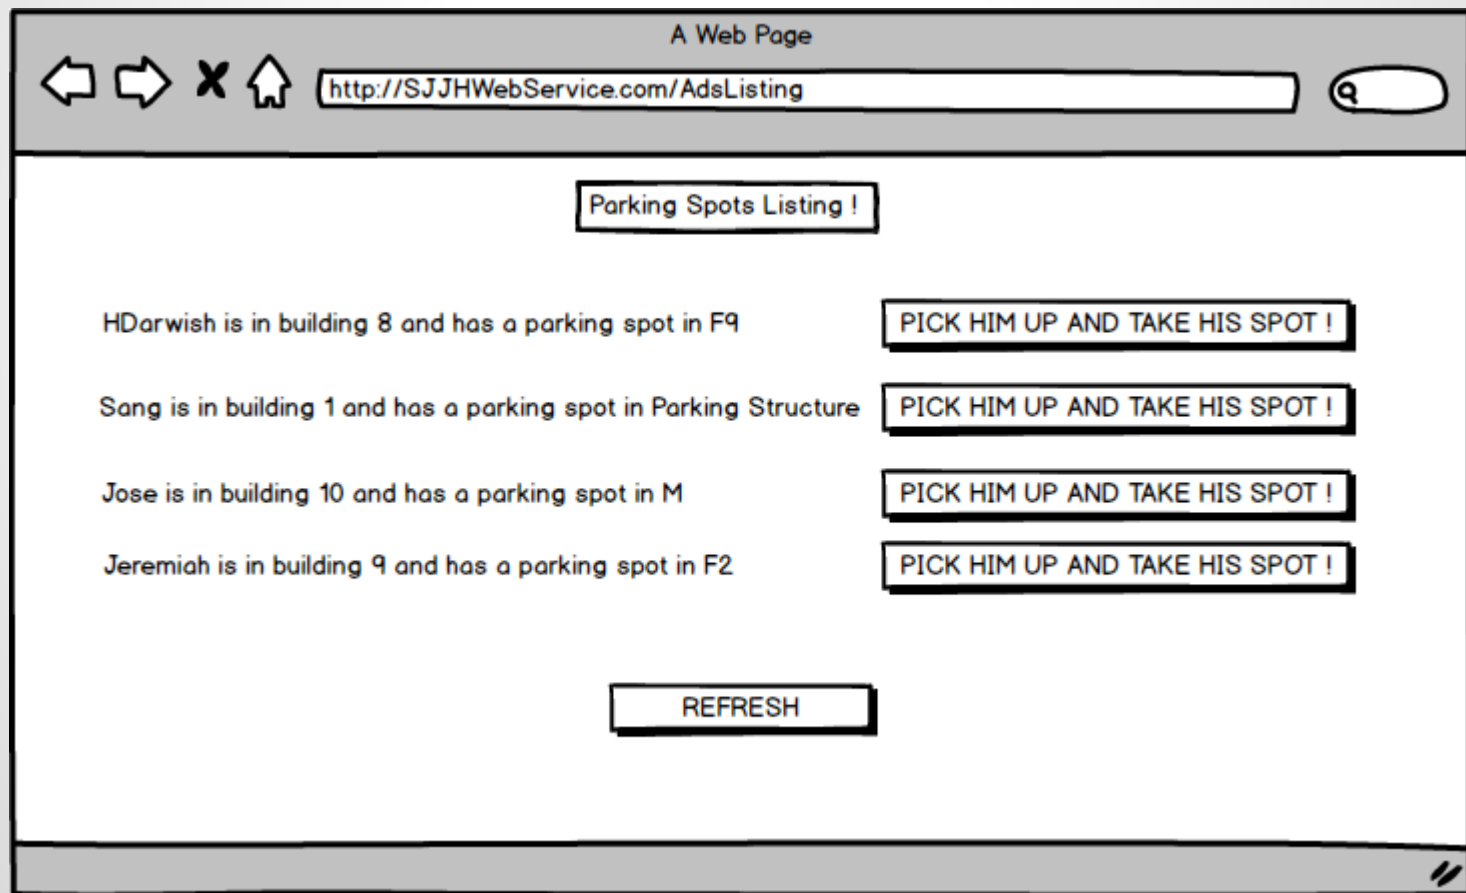

Parking Structure ▼

And I'm leaving at

	AM	PM
--	----	----

PICK ME UP !

- Our solution will allow students to check the ads and pick up the owner of the vehicle in the parking spot that they like and take his parking spot.

**We hope that this web service can  
make our parking experience in CPP  
slightly better**

THANK YOU !
