

CS480 Software Engineering

Assignment 10 - Publish Your Project

Due Date

Monday, March 9, 2015

Score

5

Questions and Directions

It's time to publish your project and get ready for the final demo.

The last team assignment is to publish everything in our course project website:

<http://cs480-projects.github.io/>

Please update your team page with the following information in our GitHub repo

(<https://github.com/cs480-projects/cs480-projects.github.io>):

- Team name
- Team members
- Project Name
- Project Logo (It is OK if the logo does not look very good, but you must have one ;-)
- Project Screenshots (Put some nice screenshots of your running projects in the website to show the idea)
- URL to your deployed project
- URL to your project GitHub repo
- URL to your presentation slides (You can do this after your project demo next week)
- (Optional) URL to the Youtube video demo of your project (You get bonus for doing this)

This not a technical assignemnt, but it is very important. You have spent so much time and effort on it, and you just need a little bit extra effort to let others see it.

We do not require very nice web/UI design. Just make sure that you put all the information there.

This would be a great thing to put in your resume.

Note: Please be very careful about working in this repo. Pay attention to CONFLICTS and DON'T delete others' work!
